

MOVE
BY CATARINA LARSSON

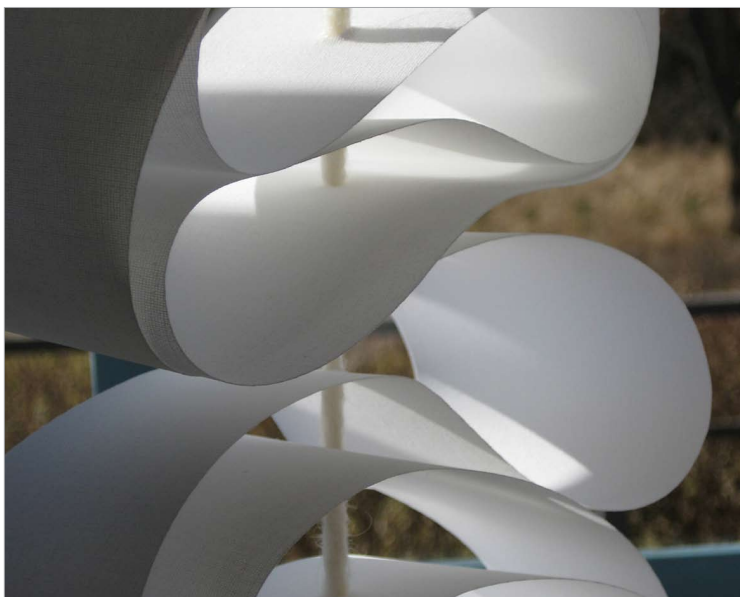

Move is a hanging decoration constructed of biodegradable material, and is suitable for use as a room divider or window ornament. Move is flexible and can easily accommodate different interior spaces.

I have always had a strong desire to work with textiles.

I am interested in the way they transform an environment; how they communicate with their surroundings and create a location's identity. People enjoy textiles - not only when they wear them, but also when they share a space with them. Carefully designed textiles give harmony, warmth and quiet.

Move is a hanging decoration constructed of biodegradable material, created for use as a room divider or window ornament.

Move is flexible, and can easily accommodate different interior spaces. Each individual user assembles Move and determines its final appearance according to their taste.

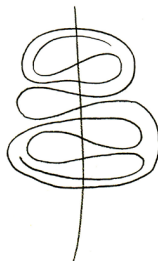

Catarina Larsson

Born 1958 in Löt, Sweden. Trained as a textile designer at Textilhögskolan in Borås; graduated 1986. Worked with textiles and furnishings at IKEA 1986-2002. As of 2002 I have worked full-time in my studio.

GREEN CHOICES

- Muffles sound and softens light
- Natural material, biodegradable
- Flexible and expandable
- Simple production method; each individual user assembles Move and decides its final appearance

Move, a flexible hanging decoration in natural material.
